by employees at non-  
profit organizations in  
our service communities

**\$70,000+**  
DONATED  
by employees to the Greater  
Valdosta United Way

## Patient Care

### Primary Care

In addition to SGMC Health's vast primary care network, SGMC Health partners with Mercer University School of Medicine to offer an Internal Medicine residency, bringing 8 physicians to the area each year for a three-year term. Physicians also increase access to primary care by seeing patients in a continuity clinic.

### Heart & Vascular

The region's only open-heart program, structural heart center, and cardiac electrophysiology program. Recognized by the American College of Cardiology and American Heart Association for sustained, high level performance in quality of care.

### Cancer

The Pearlman Comprehensive Cancer Center provides quality cancer care close to home. A highly-trained team of fellowship-trained pathologists, surgeons, hematologists/medical oncologists, and radiation oncologists offer full-service clinics and advanced treatments.

### Neurosurgery

SGMC Health offers 24/7 neurological services and trauma care. Neurosurgical conditions and procedures treated at SGMC Health include disorders of the brain, spine, spinal cord, and peripheral nerves.

### Trauma & Emergency Services

SGMC Health operates one of the busiest emergency rooms in the region. Focused on increasing patient accessibility, SGMC Health is the area's only Level III trauma center. SGMC Health's trauma center handles life-threatening and critical injuries like gunshot or stab wounds, severe car crashes, blunt trauma, and brain injuries.

### Women and Infants

The Breast Center offers women the latest breast imaging technology, coupled with convenient online scheduling.

The Birthplace has the region's only Level IIB NICU and the area's only OB hospitalist and OB ED. SGMC Health offers secure video surveillance for NICU babies, in addition to cord blood banking and placenta donation programs for interested mothers.

## Credentials

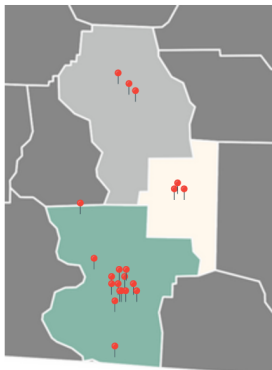

SGMC Health hospitals, as well as the Stroke Program, are accredited by DNV's Integrated Accreditation of Healthcare Organizations, also called NIAHO®.

SGMC Health is focused on being the safest hospital in the nation through proven best practices and high-reliability organization (HRO).

SGMC Health is proud to be recognized locally, statewide, and nationally for exceptional care for our patients, employees, and physicians.
